Language is our primary source of communication. We share our ideas and thoughts with others through language. Some people even say that language is what separates us from animals and makes us human.Hindi, an Indo-European language spoken mainly in northern and central India, is the primary official language of the Union government of India.As such, Hindi is incredibly important in the historic development of the world's cultures, and well worth not just honoring, but studying. Hindi is one of the many languages in India that is considered the national and official language of India.

Languages vary enormously in global importance because of historical, demographic, political, and technological forces.Hindi serves as a unifying language across India, a country home to 1.2 billion people with over 122 major spoken languages. With its status as an official language, speaking Hindi opens the door to experience all aspects of life in India: from education and everyday communication to business opportunities. Hindi is truly the common language for government, business, media, and entertainment.

India is a land of diversity in terms of geography, people, cultures and languages. Hindi, the official language of multi-lingual India, is the second most spoken language after Chinese. It is the major language of India, home of the Indus Valley Civilization and now one of the fastest growing economies in the world. Learning Hindi opens a vast and new horizon to one of the oldest, richest and vibrant cultures and philosophies in the world.

Anyone that wants to compete globally will need to put some effort in growing business into India. India is currently the top ten list of largest economy in the world (by GDP) after the

USA, China, and Japan. It is predicted that by 2020, that India will surpass Japan. With India's huge potential for growth and innovation as made the importance of Hindi as a global language. India's growth seems unstoppable and shows no sign of slowing down. Companies that eye operational and sales expansion in the South Asia region are mostly recruiting people who are familiar about Indian culture and who could articulately and fluently speak and write Hindi. The importance of Hindi-speaking population as an important global market segment. Making it a very viable and important target for most global-minded businesses. Everyone are influenced with the cyclonic effects of globalization since the last 20-30 years. However, as far as Hindi is concerned, it has benefitted immeasurably after the globalization. The impact of Hindi being felt on the working style of corporate culture of these companies is highlighting the increasing blow of Hindi.

Whether one day you plan to launch a tech startup, produce films, facilitate international trade, impact environmental and energy relations, or monitor international military issues, learning Hindi and understanding the significance of India will set one apart in the global job market and welcome you into a diverse culture steeped in ancient history.

With a tremendously ancient and rich history today, India is one of the fastest growing economies in the world and language is an essential component of competitiveness. With a global supremacy of professionals in various fields, India is now attracting numerous international businesses from all over the globe. Although one can get by with English in the cities of India, to truly understand the culture takes the extra step of learning a local language.

Dr.P.K.Jayalakshmi, Head, Dept. of Hindi and Coordinator of the National seminar said that during the two days of the seminar Resource persons have delivered interesting lectures and the 25 participants presented papers on Global Perspectives of Hindi. A great number of delegates participated in this Seminar and had fruitful exchange of ideas and research knowledge for future studies. .

Chief Guest released the National Seminar Proceedings Vishwa Bandhu on this occasion. Dr.S.Krishnababu, Dr.S.K.Malaviya, Dr.Sumanlata, Prof.B.Mohini, Prof.S.M.Iqbal, Dr.K.Shanti, and Mrs.Anupama Tripathi were the Resource Speakers for the Technical sessions. Hindi Faculty and Students from various colleges, Translators, Research Scholars and Hindi lovers participated in large numbers in the seminar. Dr.S.Deepthi proposed the vote of thanks.

Report of the National Conference Organized by Dept. Of Mathematics

Names of the Convener : Mrs. P. Krishna Kumari HOD ,Dept of Mathematics

Organizing Secretary of the Seminar: Dr. Capt. K. Sujatha Lecturer in Mathematics

Report of the Conference

The Department of Mathematics, St. Joseph's College for Women(A), Visakhapatnam organized UGC Sponsored Two Day National Conference on **“RECENT ADVANCES IN MATHEMATICS AND ITS APPLICATIONS RADMAS-2016”**, on 17-11-2016 & 18-11-2016 in collaboration with Prof. S. Minakshi Sundaram Memorial Society, Hyderabad.

The main objective of this conference is to inspire the Teachers, Academicians, Researchers and Students of Mathematics to view Mathematics as a dynamic ever growing discipline and understand its applications, where the participants will be able to

- ❖ Get the much needed exposure in the latest developments in the field of Mathematics and its Applications.
- ❖ To assess recent developments in the field of Mathematics to discuss future directions in terms of theory, practice and education.
- ❖ Rethink their methods of teaching the students in their respective Colleges.
- ❖ Motivated to take up research in Mathematics.

The proceedings of Two day UGC National conference are a collection of the invited talks and paper presentations representing the experiences and innovations of Academicians, Researchers who participated in the Conference. There were 7 technical sessions such as

TS-1: Mathematical Fluid Mechanics by Prof. G.P. Raja Sekhar, Professor in Mathematics,

IIT, Kharagpur Chaired by Dr. K.Manikya Kumari HOD Dept of Botany(SJC)

TS-2 : Existence of Fixed Points / Common Fixed Points of Various Types of Contraction Maps by Prof. G.V.R. Babu, Professor in Mathematics, Andhra University, Visakhapatnam Chaired by Mrs.Manju Pathania HOD, Dept of Management studies (SJC)

TS –3 : Trapdoor Systems with Polynomials by Dr. P. Anuradha Kameswari, Assistant Professor in Mathematics, Andhra University, Visakhapatnam Chaired by Mrs. Mary Vijaya Ratna Dept of Physics(SJC)

TS- 4 : The Application of the Infimum Property to Fixed Point Theorems by

Prof. T. Phaneendra, Professor in Mathematics, VIT, Vellore Chaired by Mrs.
E.Harini
HOD, Dept of Zoology(SJC)

TS- 5 : Some Unsolved Problems in Theory of Numbers by Prof. V. Sitaramaiah, Professor
in
Mathematics, GITAM Institute of Technology, GITAM University,
Visakhapatnam
Chaired by Dr. P.Magaveni Dept of Chemistry(SJC)

TS- 6 : Fixed and Common Fixed Point Theorems in Partially Ordered Metric Spaces with
Rational Type Expressions by Prof . K.K.M. Sarma, Professor in Mathematics,
Andhra University, Visakhapatnam Chaired by Dr. P. Jayalakshmi HOD, Dept of
Economics(SJC)

TS- 7 : Interesting Results in Metric Fixed Point Theory and Applications by
Prof. P. P. Murthy, Professor, Department of Pure and Applied Mathematics,
Guru Ghasidas Vishwavidyalaya (A Central University), Bilaspur Chaired by
Dr .Y.Lakshmi Prabha Dept of Homescience(SJC)

The paper presentation was based on the themes like

- ❖ Recent Developments in Algebra and its Applications in Science& Technology.
- ❖ Latest Trends in Graph theory ,Fuzzy algebra, Cryptography & Fixed Point Theory and
its Applications.
- ❖ Recent Advances in Analysis and their Applications.
- ❖ Recent Research in Mathematics Education and Future Outlook
- ❖ Inter Disciplinary Applications of Mathematics in other Fields.

We are very glad to inform you that 224 delegates participated from all parts of the country and as the Editors, we would like to ensure that the rights of the contributors have been respected and small changes were made in the text submitted by them except for the purpose of formatting to publish.

Rationale of the Conference

Mathematics is a universal part of human culture and has rightly been

referred to as the “Queen of Sciences” by Carl Friedrich Gauss. Mathematics is a language - a tool for scientific knowledge and its representation. Mathematics makes the job easier in maneuver knowledge because once put in mathematical frame, it gets an elegant and abstract form.

Mathematics finds application in biology, chemistry, and physics referred to as “Basic sciences”; in economics, psychology, and sociology referred to as “Social Sciences”; in engineering; and in technological fields such as computers, rockets, and communications. Even in the field of arts, i.e., sculpture, drawing, and music mathematics forms an integral component. In addition, anything which uses a computer uses mathematics which is a well known fact! Mathematics helps in recognition of patterns and to understand the world.

Mathematics plays a vital, often unseen, role in many aspects of modern life. Mathematical competence has been identified by the European Parliament and the Council of the European Union as one of the key competences necessary for personal accomplishment, enhancement of social status and finding employment in modern society. The higher the technical development of a community, greater the need for people with advanced levels of mathematical education. Analytical and quantitative skills are essential employability skills sought by a wide range of employers. A degree in mathematics provides one with a broad range of skills in investigation, commonsense and flexibility in thinking. These three qualities lead to jobs that are stimulating, demanding and varied in nature. There can be no doubt that a degree in mathematics provides particularly good job opportunities.

Many educated persons, especially scientists and engineers, visualize mathematics as a well stocked shelf with formulas, theorems, and results which are readily available to passing scientists to foster their premises. Mathematicians, however, see their field as a rapidly growing library, nourished and shaped by forces outside mathematics while contributing to human civilization a rich and ever-changing variety of knowledge. These differences in perception are due primarily to the abstract language that separates the mathematical field from the realm of ordinary human activity. Research shows that these differing conceptions have an influence on the ways in which both teachers and mathematicians approach the teaching and development of mathematics. Some see mathematics as a static discipline developed abstractly. Others see mathematics as a dynamic discipline, constantly changing as a result of new discoveries from experimentation and

application.

In India, Mathematics was seen to be an essential part of school as well as Higher Education curriculum from the very beginning but the viewpoints were varied. While the Zakir Husain committee in 1937 saw it in relation to work, the National Policy on Education in 1986 saw it as a “vehicle to train a child to think, reason, analyze and to articulate logically.” In spite of these differing viewpoints, the shape of mathematics education has been more or less the same over the last 50 years.

In response to global curricular processes in India too there has been considerable curricular acceleration in school Mathematics. At school level, excessive use of procedure and the pressure of Board and Entrance examinations for access to prestigious institutions have created a culture of highly competitive preparation among the urban elite, and this has taken a toll on meaningful mathematics.

At the undergraduate level, the core curriculum remains much the same, though the impact of technological advances can be seen. Among the large number of universities and a vast number of affiliated colleges, which provide the bulk of tertiary mathematics education, there is an overall rigidity in curriculum, pedagogy and modes of assessment that make mathematics education often ineffective, and this affects the prospects of building a strong pool of mathematics teachers who are aware of the dynamic nature of the subject. An important agenda for mathematics education in India is research in Mathematics education. Further, the idea of research providing solutions to curricular mystery or academic suffering remains outside the framework of decision making in Mathematics education.

The main objective of this Conference is to inspire the teachers, academicians, researchers and students of mathematics to view Mathematics as a dynamic ever growing discipline and understand its applications

Sahay

Wholistic development

St. Joseph's Assistance for Holistic Adjustment of Youngsters

The objective of initiating this Sahay is to create:

- 1) Awareness workshops for teachers and general public
- 2) Educational counselling for success in students
- 3) Personal and career counselling
- 4) Psychological Assessment –Aptitude, Intelligence and others
- 5) Services of Psychologists/ psychiatrists.

Children achieve their optimum potential as well-balanced individuals with a holistic personality when they are guided appropriately. Very often parents and teachers of today feel helpless because the children do not respond to their guidance. Sahay will help to assess the child relationship practices while suggesting modifications where necessary. The Activities of Sahay during 2016-17 was taken up by Sr.Clair. It was open daily between 3:00 pm – 5:00 pm. They lend their helping

hand to other institutions along with their complete attention within the institution. Many experts rendered their services during this academic year.
